*) Nimis subinduntur circiter centum uocabula, si excepis obliquis literis distincta, quae ad id potius pertinent genus supplementorum, cuius in Zeitschrift für die österreichischen Gymnasien 1873 p. 329—345 specimen edidimus (vocabula, quibus testes aduocant antiquiores vel certe locupletiores). Ceterum admixta sunt aliqua ideo recepta, quia nondum cognita erant ea quidem qua hic proferuntur aut a) sui forma, ut 9 (adu.), 102 (comp.), 45 et 106 (posit.), aut b) significatione, ut 43, 54, 82 sq., 109. Denique indidimus quedam ut Firmici, matheseos librorum VIII auctoris, adhuc deputata peculiaria (cf. A n. 86), nunc aliorum contestificantium locis instructa.

Subindendis illis in III, ut praediximus, uocabulis alio subnexiis, seorsim descriptum in inferiore parte paginarum alterum ordinem uocabulorum supplemento attestacionis instructorum. Sed haec subsicina, ut ea fere, quae in C^o exhibuimus, prorsus serotina sunt omnia, quantum quidem scimus, genimina linguae (sec. IV sqq.). In quibus cum iam nihil aliud propositum fuerit, quam ut ad C. E. Georges lexicon manuale auctarium quoddam testimoniorum afferremus, nouas dum superinducimus de eorum uocabulorum usu testes, neteres ac notos auctores, qui apud Gg aliosque rari, ad pleraque horum singuli proferuntur, omnes ubique referre non habuimus necesse.

Peculii vocabularis
Annaeani
breuiarium.

Vocabulorum, quorum L. Annaeum Senecam auctorem habemus aut unicum aut nos quidem antiquissimum, per singula facturae genera ternos descripsimus ordines, primum eorum, quae singularia esse uidentur Senecae, secundum eorum, quae apud recc. demum denuo innenuntur scriptores, tertium eorum, quae apud alios quoque primi post Octavianu Augusti excessum seculi scriptores exstant, sed Seneca posteriores aut tempore, quo uixerunt (ut Tacit., Suet., ceterique Domitiani Traianique temporum), aut certe tempore, quo scriperunt (ut Plin. historiam naturalem). Quartum denique tertio subinniximus ordinem ceterarum uocum, quas Seneca cum seculi sui scriptoribus communes habet, iis nimirum, quos ante ipsum (ut Seneca pater, Vell. Paterc.) aut per eadem fere tempora, C. Caesaris, Claudi, Neronis, floruisse constat (ut Celsus, Petron., Colum.).

⁷⁾ Quorum sexaginta quinque, nett. autem triginta (in summa 95 = 23, 7 pCt.) exemplis lugales formas inuenio adesse in -o (aut certe — nn. 197 et 234 — in -o) expressas, ut sunt u. c. fracte, fuse, glomerate, granate, incise, inculpate.

Per singulos ordines M. Ann. Lucani, qui fratris Senecae filius fuit, peculiares quaecunque inueniebantur uoces interposimus in []. Distinximus fere ordines primum a secundo στιγμῇ μέσῃ (,), secundum a tertio ὑποστιγμῇ obelo (—), tertium a quarto στιγμῇ μέσῃ et obelo (—), sicuti tamen opus esse uidebatur, siglis a b c d usi. Ceterum quaecunque Seneca praeeunte aut poeta aut aliquo superiorum usurpauit, siue rariora siue ipso frequentius exemplique posteris, ueluti praeeunte Liuio e. c. controversiosus, fluctuatio (dial. IX, 1, 47 al.), imaginarius, inenarrabilis, internasci (dial. VII, 9, 2), Vergilio e. c. insertare, intractabilis, irreparabilis, post Horat. e. c. remiscere, imprimis autem multa Ouidio suo auctore, ut astupere, concuare (apocol. 4, 3), cothurnatus, uelutinus, inobseruatus, reuocabilis (etiam Herc. fur. 363), — ea omnia ceteraque ad scriptoris ingenium eloquio naturam pernoscendam pertinentia conquirere ac componere supersedimus, imo studiose missa fecimus. Non enim de Senecae usu uerborum, sed de Seneca usus temporum teste hic agitur.
